FORTY THIRD YEAR

The **OLIVER** *Straight Line* **SAW-**

NO. 94-D
**OLIVER STRAIGHT-
LINE CUT OFF SAW**

The OLIVER straightline cut off saw gives you absolutely straight line operation—that's insured by the scientific suspended accurate link motion. A touch of the finger enables you to cut the stock accurately straight—the saw then returns to its original locked position automatically. It is quick in action, does more work and costs less to operate. Takes less floor space than any other cut-off saw. This machine is a self contained, sturdy unit with motor mounted directly on saw arbor. It's the saw you need for quick, dependable, economical production. Write for full information today.
